UI/UX designer with a strong Software Engineering background. Understands Software systems and processes from a technical perspective and able to speak the developers' language and act as a bridge between designers and developers. Skilled in Design Thinking Process, UI Design, UX & Interaction Design, Front end development skills & Agile methodologies.

Work Experience

Technology Analyst, *Infosys Limited, USA*   2016 - 2019

- Worked onsite with the client, Mercedes-Benz Financial Services, as a Senior Web Developer utilizing Scrum model for Software development.
- Met with Clients to understand Business and System requirements.
- Paraphrased the requirements into technical specifications & created test cases based on the same.
- Created UI Prototypes using Infosys proprietary Rapid Prototyping Tool.
- Designed and Developed solutions using Java Enterprise Edition technologies including Bootstrap, JavaScript, HTML5 and CSS3.
- Utilized Github (Git) version control system for all the project artifacts

Software Engineer, *Marvel Technologies Inc, USA*   2014 - 2016

- Worked onsite with the client, Mercedes-Benz Financial Services, as a Java Developer/System Analyst utilizing both Waterfall and Scrum models for Software development.
- Used Subversion (SVN) version control system for all project artifacts.

Senior Software Engineer, *Accenture, India*   2007 - 2012

- Worked with clients like Royal Dutch Shell & JP Morgan Chase for the design and development of multiple systems.
- Closely worked with the onsite team to formulate technical solutions & assist in preparation of design documents including Flow charts & Class diagrams.
- Collaborated with developers across teams for consistent integration of services & interfaces.
- Primarily used Java and JEE technologies including Javascript/HTML/CSS for front-end development.

Education
